Table 27. Health sensitivity to the chosen K

K	Silhouette	Smallest cluster n	Largest cluster n	ARI vs hidden patterns
2	0.180	536	664	0.382
4	0.110	207	392	0.538

Only K changes. Hidden-pattern agreement is available because this is a simulation; it is not a real-world validation target.
